

# UCLA Research Study for Children and Teens with Mood & Temper Problems

UCLA is looking for children and adolescents to participate in a research study.

## Your child may be eligible if he/she

- Is 7 – 17 years of age
- Is frequently moody, irritable, cranky, distractible, or agitated
- Is prone to temper tantrums, “meltdowns” or aggression

## Participation involves

- 12 study visits over 3 months
- Medical and psychological evaluations

## Your child will receive

- A comprehensive evaluation
- If eligible, 12 weeks of study medication (ADHD medication + antidepressant or placebo)
